Learn what makes a good retrospective

Experience a retrospective

Overview of steps for a retrospective
The 5 stages of a retrospective

1. Open
2. Gather data
3. Generate insights
4. Action
5. Close

Agile Retrospectives
Esther Derby, Diana Larsen
1 - Open

To get everyone to talk
Set the retro tone
2 - Gather Data

What happened?
Facts, shared perspective.
Not emotions or solutions
3 — Generate Insights

Understanding what happened and why?
Dig to root cause.
4 - Action

The thing you do to improve together as a team.
5 - Close

Thank people for their time.
Get feedback on your retro.
Let's have our own Retrospective
1 - Open

At tables – go around –
One word to describe the conference
For YOU so far
2 - Gather Data

What sessions have you attended?
What have you enjoyed?
What drained your energy?
What would you have liked more time for?

Facts, shared perspective.
Not emotions or solutions
3 – Generate Insights

What patterns do you notice?
What insights pop up?
Share at your table – often others insights can help you…

Understanding what happened and why?
Dig to root cause.
4 - Action

What is the 1 thing you can do to make tomorrow better?

What will you do?

What do you expect to change because of this?

How will you be able to tell if it's working?
5 - Close

Share your action with another person in the room
Would anyone like to share 1 insight about retrospectives?
Thank You!

Please rate our session & leave us feedback on the door as you leave.
